

## NUS1000 Network USB Storage Link

**New** Remote access from computers & smart phones

- Access USB hard drives and USB flash drives over a network connection
- Share music libraries using the built-in iTunes server
- Stream photos, music and movies to compatible entertainment devices over your network
- Download directly to connected USB devices using the built-in BitTorrent client
- Access printers over a network using the built-in USB print server
- Simple setup and administration through web interface
- Supports multiple user accounts and permission levels
- Small size and low power consumption

The Cirago NUS1000 Network USB Storage Link turns any USB mass storage device into a networked attached storage. With 4 USB ports on the NUS1000 and a maximum capacity of 2 TB per USB port, you can have up to 8 TB of storage connected to your network and your own personal cloud.

The print server allows you to share a USB printer across your network without having a computer constantly powered on. You can easily share media files and music over your network using the built-in Media and iTunes servers. With the built-in BitTorrent client, peer-to-peer file sharing from connected USB storage devices can be set up in a few steps. The intuitive web interface allows you to quickly create and maintain users accounts and permission levels.

The NUS1000 is networked storage made simple.

### Specifications:

Interface	4x USB 2.0, 1x Ethernet (100 Mbps)
Supported network protocols	Samba(SMB), LPR (print server), UPnP
Supported file systems	FAT32, EXT2, NTFS (read only)
Maximum Hard Drive Capacity	2 TB
User accounts	32
Warranty	1 year
Accessories	AC adapter, RJ-45 cable, User Manual
Dimensions	4.4" x 3" x 1.0" (unit)
