- Quick Installation Guide

4. Installation

- Connect the power adapter
- Connect the dock to your computer using the USB cable.

Insert 2.5" or 3.5" SATA HDD into the dock

5. Removal

Warning:
Do not remove a hard drive when the disc is reading or writing. Turn off the dock before removing the hard drive to ensure safe removal.

6. Driver Installation

Windows 2000/XP/VISTA
No drivers are necessary when using Windows 2000/XP/Vista. If the hard drive does not appear under My Computer, right click on My Computer, click on Manage and go to Disk Management to partition the drive.

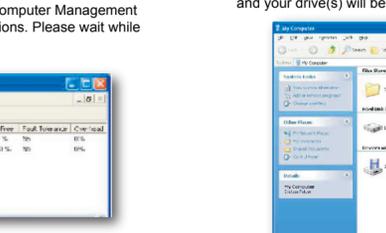

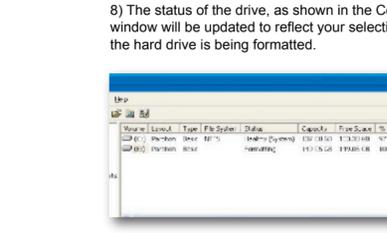

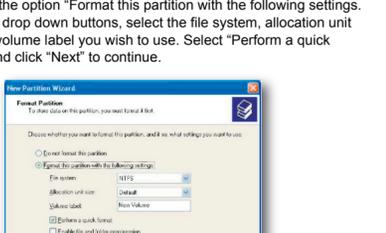

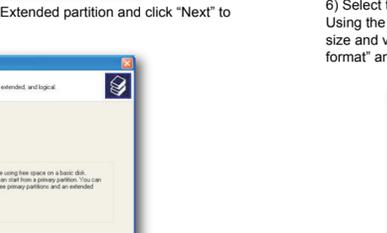

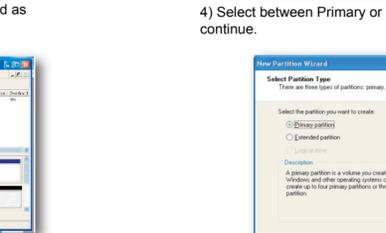

Windows ME/98
The first time you plug in the dock into a USB port of your computer, the "Add New Hardware Wizard" dialog box will appear.

- Click on "Next". Check the "Search for the best driver for your device" and click on "Next".
- After the needed files are copied into your system, click on "Finish".
- You should now be able to see the new hard drives under My Computer.
- You can also install the driver from the CD.

A green Unplug or Eject hardware icon will appear in the system tray as well. If the drive does not appear, you may need to partition your hard drive first.

7. Preparing the Hard Drives for Use

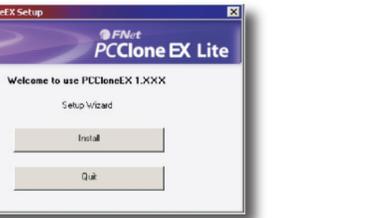

- 1) Right Click on the My Computer icon and select "Manage". In the left panel of the Computer Management window, click on Disk Management.
- 2) Locate your SATA hard drive in the list. If it is listed as "Unallocated", click on it and select "New Partition".

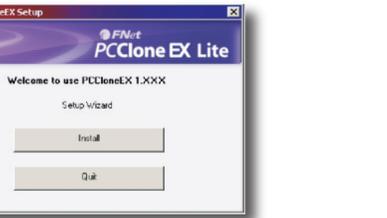

- 3) The New Partition Wizard will popup. Click "Next" to continue.
- 4) Select between Primary or Extended partition and click "Next" to continue.
- 5) Specify the size of the partition you wish to create. Click "Next" to continue.
- 6) Select the option "Format this partition with the following settings. Using the drop down buttons, select the file system, allocation unit size and volume label you wish to use. Select "Perform a quick format" and click "Next" to continue.

- 7) A notification window will appear indicating that you have successfully completed the New Partition Wizard.
- 8) The status of the drive, as shown in the Computer Management window will be updated to reflect your selections. Please wait while the hard drive is being formatted.

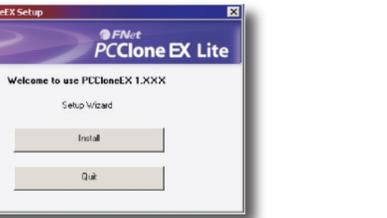

- 9) Once the drive has been successfully partitioned and formatted, it will be listed as "Healthy".
- 10) To access your newly partitioned drives, go to "My Computer" and your drive(s) will be listed under Hard Disk Drives.

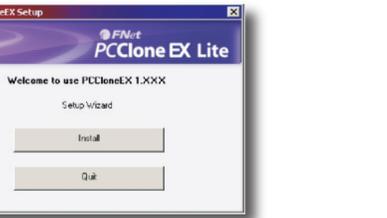

Insert the Drivers CD and the below screen will pop up.

When the installation is completed click "OK" to continue.

The "PC Clone EX Lite" icon will be displayed in the taskbar. Double click the icon to launch the software.

For detailed information on how to use the PC Clone EX Lite software, click on the Help button.
